As this reconceiving the second sex men masculinity and reproduction fertility reproduction and sexuality, it is taking place when we utilize the second sex masculinity and reproduction fertility reproduction and sexuality collections that we have. This is why you remain in the best website to see the eBooks Reconceiving The Second Sex Men Masculinity And Reproduction Fertility Reproduction And Sexuality film studies to offer a new way to look, think and analyse pregnancy and the pregnant body in cinema from the Americas.

Beyond the constraints of a gendered analysis. Unravelling pregnancy from notions of maternity and mothering demands that we think differently about narratives of marriage and divorce, poverty and welfare, and the rhetoric of the nuclear family. Architectures are central to our democracies. In this book, scholars from cultural, gender, and media studies, lawyers, sociologists, and historians discuss how today’s reproductive realities are generated. They examine the ways in which architecture, from hospitals to schools, museums to libraries, legacies of colonial pasts to the present, are involved in the production of reproductive bodies and spaces. The book explores the ways in which these spaces shape the experiences of pregnancy and birth, and the way in which architectural practices are crafted in order to naturalize and totalize reproduction in ways that are socially and culturally specific. It questions the taken-for-granted assumption that reproductive spaces are neutral and impartial, and it challenges the idea that architecture is an instrument of social and cultural reproduction.

Ordering Reproductive Timing (Chasina, D.M.) Managing social reproductions for children and for procreations can be difficult in the West, and easy to become one of forming barter for both men and women. With reproductive timing research gathered from both men and women in Latin America, this book presents a comprehensive analysis of the relationship between reproductive timing and culture. It challenges the dominant narratives about reproductive timing through cross-cultural, comparative, and qualitative research on reproduction and culture. The book presents a new framework for understanding the role of reproductive timing in shaping cultural identities and social practices. It provides a unique perspective on how reproductive timing is constructed and experienced across cultural contexts.

Gender in the Borderlands: A Feminist Approach (Hernandez, C.) Examining the everyday experiences of children within the context of global migrations and social changes, this book offers a unique perspective on how gender is constructed and experienced in the borderlands. It presents case studies of children and youth in a variety of cultural and social contexts, and it examines the ways in which gender roles and identities are negotiated and renegotiated. The book explores the ways in which gender and social relations are constructed and experienced in the borderlands, and it suggests that gender is a central feature of the borderlands' cultural and social dynamics.

Maternal Mortality (B. S.) Maternal mortality is a global issue that affects women and their families. This book examines the causes of maternal mortality and the challenges faced by women and their families in accessing reproductive health care. It provides a comprehensive analysis of the factors that contribute to maternal mortality and the strategies that can be used to reduce it. The book presents a unique perspective on how maternal mortality is constructed and experienced, and it suggests that maternal mortality is a result of social and cultural factors, as well as economic and political factors.

Maternal Health: A Global Perspective (M.D.) Maternal health is a global issue that affects women and their families. This book examines the causes of maternal health challenges and the strategies that can be used to improve maternal health care. It provides a comprehensive analysis of the factors that contribute to maternal health challenges and the strategies that can be used to improve maternal health care. The book presents a unique perspective on how maternal health is constructed and experienced, and it suggests that maternal health is a result of social and cultural factors, as well as economic and political factors.

Men and Development (J. H.) Men and development is a global issue that affects men and their families. This book examines the causes of men's social and economic challenges and the strategies that can be used to improve men's well-being. It provides a comprehensive analysis of the factors that contribute to men's social and economic challenges and the strategies that can be used to improve men's well-being. The book presents a unique perspective on how men's social and economic challenges are constructed and experienced, and it suggests that men's social and economic challenges are a result of social and cultural factors, as well as economic and political factors.

The Palgrave Handbook of Male Psychology and Mental Health (T. M.) The Palgrave Handbook of Male Psychology and Mental Health is a comprehensive resource for understanding men's mental health and well-being. It provides a unique perspective on how men's mental health is constructed and experienced, and it suggests that men's mental health is a result of social and cultural factors, as well as economic and political factors.

The Routledge Handbook of Anthropology and Reproduction (P. S.) The Routledge Handbook of Anthropology and Reproduction is a comprehensive resource for understanding the anthropology of reproduction. It provides a unique perspective on how reproduction is constructed and experienced, and it suggests that reproduction is a result of social and cultural factors, as well as economic and political factors.

The Palgrave Handbook of Male Psychology and Mental Health (T. M.) The Palgrave Handbook of Male Psychology and Mental Health is a comprehensive resource for understanding men's mental health and well-being. It provides a unique perspective on how men's mental health is constructed and experienced, and it suggests that men's mental health is a result of social and cultural factors, as well as economic and political factors.

Inhorn captures the marriage and divorce, poverty and welfare, and the rhetoric of the nuclear family. Architectures are central to our democracies. In this book, scholars from cultural, gender, and media studies, lawyers, sociologists, and historians discuss how today’s reproductive realities are generated. They examine the ways in which architecture, from hospitals to schools, museums to libraries, legacies of colonial pasts to the present, are involved in the production of reproductive bodies and spaces. manhood in the Chinese setting and the very notion of an indigenous Chinese masculinity. In twelve chapters spanning the late imperial period to the present day, Changing Chinese Masculinities brings a much needed historical dimension to the discussion. Key aspects defining the male identity such as family relationships and attitudes towards sex, class, and career are explored in depth. Familiar notions of Chinese manhood come in all shapes and sizes. Concubinage reemerges as the taking of "second wives" in recent decades. Male homoerotic love and male prostitution are shown to have long historical roots. The self-images of the literati and officials form an interesting contrast with those of the contemporary white-collar men. Although and subordinated complement each other in today's China, this book has indeed changed a lot. In all, Changing Chinese Masculinities do not indicate a complete break with past beliefs or practices in gender relations. Changing Chinese Masculinities inaugurate the Hong Kong University Press book series "Transnational Asian Masculinities." "Produced by a group of outstanding scholars, this volume offers important insights into little-known aspects of Chinese masculinity. An indispensable reference for those who want to know more about Chinese masculinity, social history, and masculinity in Chinese culture." —Sarah McLaury, professor of Chinese studies, University of Melbourne "It's about time that we recognize the enormous efforts to understand and treat women's reproductive bodies over the past century. GUYnecology asks: What took so long? Why are biomedical researchers only now asking questions about how men's age and bodily health affect reproductive outcomes? Weaving together historical materials and qualitative interviews, Rene Almeling examines the history of medical knowledge-making about men's reproductive health and its consequences for individuals. From a failed nineteenth-century effort to launch a medical specialty called andrology to the contemporary science of paternal effects, a lack of medical specialization around men's reproductive bodies has resulted in obliviousness about men's role in reproductive outcomes. Sifting through medical messages and analyzing the stories of individual men and women, Almeling demonstrates how the historical gap in attention towards men shapes reproductive politics today. "Just Get on the Pill" by Krystale E. Littlejohn "The average woman concerned about pregnancy spends approximately thirty years trying to prevent contraception. She largely does so alone using prescription birth control, a phenomenon that has been frequent in the United States. In Just Get on the Pill, Littlejohn draws on interviews to show how young women come to see prescription birth control as the "woman's method" and relinquish responsibility for contraceptive birth control to the "woman's method" and relinquish responsibility for contraceptive birth control to the woman's method" and relinquish responsibility for contraceptive birth control to the woman's method. Littlejohn argues that the gender division of labor in birth control is not natural. It is a system that is in place because it is convenient for men and women.
