urologists. Pediatric Urology: A General Urologist's Guide is written specifically for general urologists as a concise and comprehensive reference of the more common pediatric urologic conditions. Other health practitioners (i.e. pediatrician, family practitioner, midlevel practitioners, and medical students) will also find this book a key reference. Written by well-respected pediatric urologists, this volume will assist the health care provider to rapidly review the essential aspects of the physical examination, evaluation, diagnostic testing, and management while the patient is still in the office. The chapters are arranged so that relevant concepts are clearly shown in the information. After reviewing pediatric urology, urologic surgery, and urologic imaging, the last chapter of the text will be dedicated to facts and figures for normal peed and renal function based on radiography of canine mammals, and pediatric urology reference lists that serve as a single source for this information. Pediatric Urology: A General Urologist's Guide offers the reader the essential information to assist them in the care of children.

Essential Urology

- Jeannette M. Potts 2004-02-03 Leading urologists and expert specialists review and summarize for family practitioners the latest thinking about how best to evaluate, diagnose, and treat all the most commonly encountered urologic conditions. Topics discussed range from urinary tract infections to children and adults; the evaluation and treatment of benign prostatic hyperplasia (BPH), seminal vesicle, and prostatitis. Additional chapters are devoted to the management of erectile dysfunction during pregnancy, bladder incontinence, and vesicoureteral reflux. Advances in urologic imaging (ultrasound, computed tomography, magnetic resonance imaging, and endoscopy) are also discussed, as are the roles frequently used to complement these techniques. Muscle, Nervous, and Bladder Function

- Stephen A. Zderic 2013-11-21 This conference and monograph were the result of many collective efforts. The whole concept was formulated one early Wednesday morning at our weekly research meeting at Children's Hospital in our division of urology. We have been fortunate to have a close collaboration with Bob Levin, Ed Macarak, and Pam Howard who have helped steer the course of our division's growing interest in basic sciences. At our weekly meetings our research fellows present their work and are further discussed. We have always made an effort to try and understand what other groups are doing who are working in the area of bladder smooth muscle research. It occurred to us that the best way to really know what everyone was doing in this field was doing would be to sponsor a 2-day meeting where we could all get together to discuss our ongoing work. It was a major initiative of the annual meeting of the American Urologic Association at the annual meeting of the American Academy of Pediatrics that the bladder research was limited as there were meant to be primarily clinical sessions. So we knew we needed to change the format and style of the meeting to really encourage the exchange of new ideas and the audience. Current Operative Urology
