The Politics of Justice in European Private Law

The Politics of Justice in European Private Law intends to highlight the differences between Member States’ concepts of social justice, which have developed historically, and the defined European concept of justice. Focusing on the emerging conflict of European justice demands to the aftermath of the euro crisis, this book argues that whilst the larger part of the Monetary Union, a new practice and more spreading European concept of justice is developing, European access justice is thinner than national social justice, but access justice represents a distinct conception of justice worldwide. Member States or nation states emerge from the fragmented European access justice and bring to their way access of national justice.

The Many Concepts of Social Justice in European Private Law offers genuine models of justice for society? Beyond its initial intentions focus on examine integration through the market, might it now serve the social justice of the individual? the view of Hans-W Micklitz is that justice and model of justice for society. In essence, the Many Concepts of Social Justice in European Private Law is a rich collection exploring the ideas of many, specifically European, forms of access rights, which ensure (reasonable and technically) reasonable and non-deadlock opportunities for market participants. (Hans-W Micklitz, Columba Law Notes, US) This insightful book, with contributions from leading international scholars, examines the European model of social justice in private law that has developed over the 20th century. The first set of articles is devoted to the relationship between corrective, preventive, procedural and social justice, while particularly the role and function of constitutional law is contrast to social justice. The second set of heuristic-thought articles who discuss the relationship between Member States as, the propriety order of the EU, on the role and function of the emerging welfare state and the judiciary, as well as various state-specific patterns of social justice. The final section tests the epistemology of comparative law as a scholarly discipline, in particular at its epistemology and methodology. Thus, among its contents the reader will find: a lively discussion of the kind of ‘knowledge’ that is, or could be, derived from comparative law; an exploration of the key international treaties in this field, and proposes ways to build a comprehensive global waste management regime.

Drafting Legislation

This book constitutes the first thorough academic analysis of legislative drafting. By placing the study of legislation and its principles within the paradigm of Glymour’s pragmatic norms, it offers a novel approach which avoids the tradition of comparative past description of drafting recourses. Instead of processing rules (as legislation), it sets out to identify effects on the main use of the text in the policy, legislative and drafting processes, and effectiveness of the main goal of the drafting of legislation. Through the lens of effectiveness as compliance with legislative quality, the book explores the stages of the drafting process, guiding the reader through structure and sections in legal logic sequences, and introduces rules for drafting preliminary, substantive and final phrases. It provides comprehensive legislative drafting rules that are not merely intended to guide the reader in drafting or drafting rules, but in developing an easily accessible, practical handbook; details the work of the International Law Commission on this topic; and provides the latest versions of international liability conventions and their statuses – including the latest on: (1) 2003 UNECE Kyiv Liability Protocol; (2) 2004 EC Directive on Environmental Liability; (3) 2005 Antartica Liability Annex. The authors’ combined capacity as an academic, policy advisor, and practitioner have helped bring forth a publication that reflects their experience of being involved in the development, negotiations and implementation of international environmental liability regimes at both an international and European level.
